EXAMINER'S AMENDMENT & REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond Van Dyke on 4/28/05.

An examiner's amendment to the record appears below.

In the specification:

Art Unit: 1647

Page 1, first sentence, deleted "pending" and inserted after "14, 1998, now" :

--abandoned--.

Page 9, Table 1, column "Hybrid Length (bp)", row "E", deleted "\$50" and inserted in its place: -->50--.

In the claims:

Canceled claim 13.

In claim 14, line 1, deleted the phrase "according to claim 13 further".

In claim 15, line 1, deleted the phrase "according to claim 13 further".

In claim 17, line 1, deleted "A".

In claim 17, line 1, inserted before "host": -- An isolated--.

In claim 18, line 1, inserted before "host": --isolated--.

In claim 45, line 1, deleted "A".

In claim 45, line 1, inserted before "host": -- An isolated--.

In claim 49, line 1, deleted "A".

In claim 49, line 1, inserted before "host": -- An isolated--.

2. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Bonaldo) discloses a sequence that shares 99.8% sequence identity with the instant SEQ ID NO:1. However, the Bonaldo sequence does not anticipate claims 14 or 15 because the Bonaldo sequence is only 523 nucleotides in length, whereas the instant SEQ ID NO:1 is 810 nucleotides in length, and instant claims 14 and 15 are directed to regions of SEQ ID NO:1 beyond that which is taught in the prior

Art Unit: 1647

art. Furthermore, Applicant's amendment to the instant claims concerning hybridization conditions renders the claims definite according to the fixed hybridization conditions provided in the recited portions of Table 1 of the instant specification, and the Bonaldo reference does not read on the claims were hybridization is recited because the Bonaldo sequence does not meet the claim limitations of being at least 75% of the length of instant SEQ ID NO:1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technical Center 1600 general number which is (571) 272-1600.
